

# Which site(s) are suitable for a pre-paid water system installation?

**"A well chosen water source and community acceptance is essential for a successful implementation of a pre-paid water system"**

Check by following these steps:

1

## Conduct a Quick-Scan

Pre-select sites, perform a quick scan, and choose the best based on recommended and preferred conditions for further field assessments

2

## Prepare for your Fieldwork

Learn what for 4 key factors to assess and how to do it for selecting your pre-paid system site(s) and prepare for your fieldwork

3

## Conduct Interviews

Conduct 2 interviews, one with the community development officer(s), and one with local water experts and community members

4

## Analyze & Rank Results

Analyze the results and use a rating to determine the most suitable sites for pre-paid system installations

## 1 CONDUCT A QUICK SCAN

Regional office staff: scan the QR code to perform a quick scan to narrow down your sites to the ones you can visit for further community assessments. See below a summary of the highly recommended requirements and preferable conditions assessed in the quick scan.

### Highly Recommended Requirements

#### The drinking water source has ...

- ☐ Drinking water quality
- ☐ Sufficient pressure
- ☐ Sufficient water yield

#### This pre-paid water system has ...

- ☐ Support from government agency
- ☐ Support from the community officers
- ☐ A land agreement that is secured or will be secured soon
- ☐ System is accessible year-round
- ☐ No negative political interference expected

## Preferable Conditions

Review the preferable conditions below; meeting these increases the likelihood of a suitable and accepted pre-paid system, helping you to prioritize locations for further field assessments.

## 2 PREPARE FOR FIELDWORK

- Field officer: learn why and how to assess the 4 key factors for determining a suitable prepaid system location, and learn how to create a community map by scanning the QR code.
- Field officer: check the preparation list before field visits by scanning the QR code.

### 4 key assessment factors

## 3 CONDUCT INTERVIEWS

- Field officer: interview the Community Development Officer(s) by using the questionnaire template that can be found by scanning the QR code.
- Field officer: interview the Community Members and Local Water Experts (e.g. pump mechanic) by using the questionnaire template available via the QR code.

## 4 ANALYZE & RANK RESULTS

Field officer(s) and regional office staff: discuss and analyze the interview together, and rate & rank sites. Compare the sites and decide which locations are most suitable (or not) for a pre-paid installation by scanning the QR code.
