

The PuPu can pump sludge of different consistencies into a tank away from the emptied pit.

It suits densely populated areas that are difficult to access by vacuum trucks.

Key advantages:

- Light weight, mobility, and used with any type of storage and transport;
- Plug and play
- Can pump thick sludge & level of debris with 4" hoses limiting risk of need for fishing.

0-100 meters depending on viscosity
8 meters
20 meters
100 mm (4")
Delivered with 30 meters
1-7m³/h depending on viscosity
- 0,8 to 2,5 bar
1 year
